

CUSTOMIZE USER INTERFACE

You may ask, for example:

- + How to change background color?
- + How to change the language of ARES Commander?
- + How to change the dark color of the user interface?
- + Give me the steps to add a command in the ribbon.
- + How to import tool palettes that I created in AutoCAD?
- + How to save my selection of palettes as my default configuration?

EXPLAIN HOW TO USE FEATURES

You may ask, for example:

- + How can I undo my last actions?
- + Give me the steps to import a Revit file.
- + How to create an online block library?
- + How to create annotative dimensions?
- + How to connect ARES with my cloud storage?

GENERAL QUESTIONS & CONCEPTS

You may ask, for example:

- + What is a Tool Palette?
- + What is a custom block?
- + How to say Tool Palette in Portuguese?
- + What does "마감일: 7월 15일" mean in English?
- + What is the difference between CAD and CAM?
- + Is ARES compatible with any DWG file from AutoCAD?

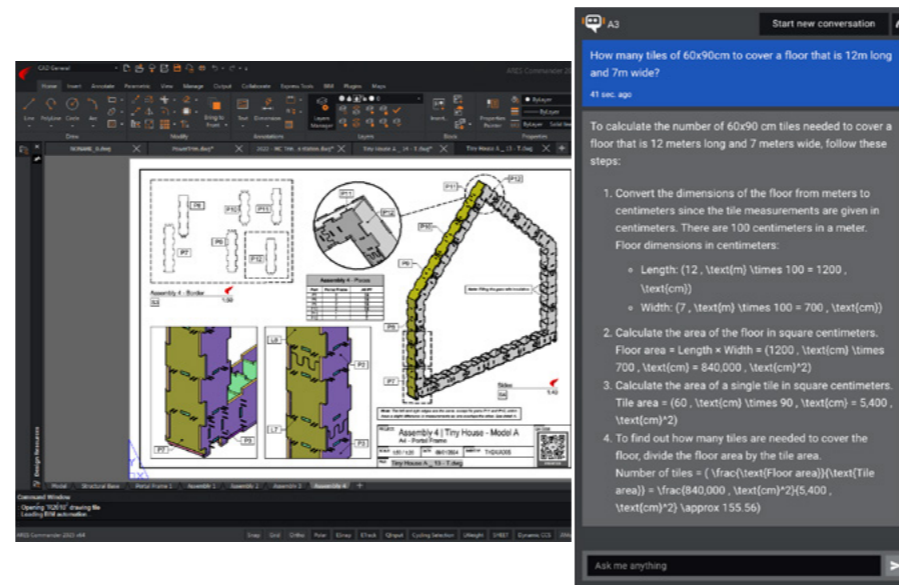

A3 – ARES AI ASSIST

Powered by OpenAI technology, the **NEW ARES AI Assist** palette in ARES Commander and ARES Kudo is an artificial intelligence trained to assist the ARES users in many languages. You can ask questions in a similar way as in "ChatGPT" but with the difference that A3 has learned about CAD and ARES products.

CONVERT OR CALCULATE

You may ask, for example:

- + Convert 1.8 acres in m2.
- + 3 US gal in liters?
- + How many tiles of 60x90cm to cover a floor that is 12m long and 7m wide?
- + How many 3.3-cubic foot boxes can fit in a 20FT container?
- + 93m in feet? or 127° in rad?

INDUSTRY-SPECIFIC ADVICE

You may ask, for example:

- + Suggest layer names for an architectural drawing.
- + I need technical advice on sheet metal blending.
- + What is the standard thickness of an interior wall in the USA?
- + How to calculate the wire gauge for a given amount of power?
- + Suggest methods to reinforce a bearing wall when space is limited.
- + What is the DIN 933 standard?

LOCATE A FEATURE IN THE UI

You may ask, for example:

- + Where are the dimensions settings?
- + Show me where the PDF import is.
- + Show me where is the Layers Manager is.
- + Where is the feature to import table from Excel?
- + Show me where is the hatch feature is.

EDITING COMMANDS

Available Only with ARES Commander

You may ask, for example:

- + Select all polylines in the drawing.
- + Select all lines with lineweight of 0.09 mm.
- + Change the color of the selected entities to blue.
- + Select all blocks on layer „Furniture“.
- + Rotate selected items around point (2, 2) by 30 degrees.
- + Move all lines to layer „Wall“ and change their color to green.
